Education

Dr. Babasaheb Ambedkar College of Engineering, Nagpur.

Nagpur, Maharashtra.

Completed B-Tech in Electronics Engineering - CGPA (7.40/10).

May-2017.

Technical Skills & Expertise

Languages: HTML, CSS, JavaScript, React-Js.

Frameworks and Libraries: React-Js, Next JS, Chart JS, Material UI, Ant Design, Bootstrap, Tailwind-css, SCSS.

Tools: Webpack, NPM, Babel, Redux, Redux-Saga, Redux-Thunk, Rest-API, AXIOS, GitHub, Bit Bucket, Azure DevOps, Jira.

Familiar Tools: Figma, PWA (Progressive Web Application), Framer Motion.

Core React-JS: Reusable Functional Components/Class Components, Inbuilt/Custom React Hooks, React-router-dom, Keys, Router, Forms, Refs, Events, Conditional Rendering, Conditional Routing, Protected Routes, Various Memoization Techniques.

Relevant Experience

Brainvire Infotech Pvt. Ltd.

Mumbai, Maharashtra.

- **Senior Software Engineer**

Dec 2022 – Present.

- Turning UI/UX designs into prototypes, creating excellent interaction from designs into a good Quality code.
- Writing reusable components using React Js workflows for future usage.

- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Validating the Code Reusable Functionality.
- Refactoring the Existing Code base for better performance and Scalability.
- Collaborates with other team members to design, develop the Websites as per the client Requirements.
- Client-Side Validations in Forms, using controlled Components etc.

Projects

- **Connex Inventory & Connex E-commerce Analytics Mobile App**

Connex is a comprehensive solution designed to streamline the automation of sales reporting and the management of businesses operating across multiple selling channels. With Connex, users can efficiently oversee their Amazon, Shopify, and Ship Station accounts through a single, user-friendly dashboard. This eliminates the need for manual data entry, enables inventory forecasting, maximizes profits from top-selling products, enhances tax deductions, and simplifies order workflows. The application, constructed using React JS, integrates seamlessly with various market selling channels, facilitating detailed report analysis and aiding users in making informed product planning decisions.

Environment: ~ React Native, React JS Next JS, .Net

Responsibilities: Designing, Development, Unit Testing, Deployment and Client Communication.

Website: <https://inventory.connexecommerce.com/>

- **Trend Append**

Trend is a mobile app available on both Android and iOS platforms. It is a social networking platform that allows users to share and edit videos. The app offers users the ability to organize their media using hashtags and tags. Posts can be shared publicly or privately, and users can view, comment, and like posts shared by their followers. The app also allows users to purchase products directly from the platform. Additionally, users can add captions to their posts and use hashtags to index them, making them searchable by other users within the app.

Environment: ~ React Native, React JS, Next JS

Responsibilities: Designing, Development, Unit Testing, Deployment and Client Communication.

Website: <https://www.trend.app/>

WPWEB Infotech Pvt. Ltd

Ahmedabad, Gujarat.

• Junior React-JS Developer

May 2022 – Dec 2022.

- Turning UI/UX designs into prototypes, creating excellent interaction from designs into a good Quality code.
- Writing reusable components using React Js workflows for future usage.
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Validating the Code Reusable Functionality.
- Refactoring the Existing Code base for better performance and Scalability.
- Collaborates with other team members to design, develop the Websites as per the client Requirements.
- Client-Side Validations in Forms, using controlled Components etc.

The Space Element Pvt. Ltd.

Nagpur, Maharashtra.

React JS Intern

July-2021– Sept-2021.

- Reviewing the Code for the Existing React JS websites to know how the data flows from one component to another.
- Translating designs and wireframes into high quality code using React JS workflows.
- Developing Reusable Components, Implementation of components from existing class based to Functional components.
- API Integration to fetch the data from the external Resources.
- I have learned what methodologies and coding standards have to be maintained and followed, also I learned how to write our components in such a manner so that we can reuse those components in future for similar kind of requirements.

Projects

- **Cake-Fantasy (E-Commerce):** <https://cakes-fantasy.web.app>

This is the first Project design I have made while learning Web development. The

Project was made for the cake shop owner who wanted to show his shop's online presence.

Stack Used: ~ HTML, CSS, JavaScript & Firebase (Web Hosting).

View website: <https://cakes-fantasy.web.app>

View Source code: <https://github.com/iamanup17/Cake-Fantasy>

- **Sporting Goods and Music Instruments (E-Commerce) :**

This is an in-house project for WPWeb infotech, Where a figma design is given to me and asked to perform all the functionalities of an Ecommerce Website. One of the major functionality I have implemented in this project is State Management using Redux-Thunk. Although there were no API's provided to me, I have built a static JSON server to make API calls, also i have used local storage for storing the cart items & user information for Login Authentication.

Stack used: ~React JS, ~Redux, ~Redux-Thunk, ~AntDesign, ~React inbuilt hooks, ~React custom hooks, ~json server, ~React-Toastify.

View Source code: <https://github.com/anupreact/Ecommerce-Shop>

- **Personal Portfolio (Portfolio):** <https://anup-dev.netlify.app/>

I have made this project to showcase my frontend development skills. This is a fully Functional & Responsive Single Page Portfolio using React JS. I have Used React functional based components to build this website.

Stack Used: ~React JS, ~Framer Motion, ~AntDesign, ~CSS Preprocessor (SCSS), ~Email JS, ~000webhosting (Hosting).
